HOT TIPS FOR NOVEMBER

Kitchen hacks to make your day

Hello to everyone, we would like to begin with a warm welcome and hope that COVID will be behind us soon. It has been a trying and enjoyable time at The Willows. We continue to welcome visitors for residents, phone calls, cards, and letters. This year we hope to be sending Christmas cards to residents' families and friends. Residents have been busy making their own cards. As we do each year, the runways for the Melbourne Cup are now being sold, so please place your bets. We are also hoping to put up the Christmas Tree early to give The Willows that Festive Feeling. We are currently collecting pictures of Christmas items for the Annual Christmas Raffle.

We wish you all well from the Cube

Prevent ripening

To avoid quick ripening of fruits, store bananas separately from the other fruits.

Retain colour

To retain the beautiful colour of spinach after blanching, transfer it into a bowl full of ice-cold water.

Prevent sticking

To prevent rice from sticking, add a few drops of oil to the rice in the cooker.

Keep in the dark

Keep your spices away from the stove or lights, as they lose their flavour when exposed to humidity and heat.

Excess water

Sprinkle a little of poppy seeds to soak the excess water in the gravy and simmer it on medium flame. This will help with excess water in gravies & curries.

Retain green colour

To retain the colour while cooking green leafy vegetables like spinach, broccoli, kale, etc add a pinch of sugar to them.

Enhancing flavour

To enhance the flavour of various dishes, toast nuts, lentils and peas before preparing the dishes.

Prevent breakages

While poaching an egg, add a teaspoon of white vinegar to the simmering water to help keep the yolk from breaking.

Enriching gravies

To give extra body and richness to curries and gravies, add beaten curd and reduce the temperature before adding.

Separate things

Run noodles/pasta under cold water immediately after boiling to separate the strings.
